

# AIRBUL

## Local multi cabinet

**The AIRBUL LOCAL MULTI CABINET is a convenient way of displaying up to 30 tanks levels on a single panel. The high quality double scale manometers are dispatched on a 6 x 5 layout. Each one is protected against overpressure.**

This marine cabinet is fully pneumatic driven. It includes up to 30 AIRBUL MODULATORS assemblies installed together with an air closing valve, an air regulator and two filters (5 and 1  $\mu$ m). Purge buttons are directly accessible on the front panel.

Air pipes coming from the AIRBUL PURGE HEAD assemblies enter the cabinet through glands mounted on the bottom plate of the system.

This unit may be used for any ballast tanks, FO day tanks, fresh water tanks etc...
